Languages

Finnish	Native (C2)
English	Fluent (C2)
Japanese	Conversational (B1)
French	Actively studying (B1)

Hobbies

- Programming
- Digital and board games
- Photography
- Cooking
- Reading

Technology Skills

Languages

JavaScript, TypeScript, CSS3, HTML, PHP, SQL, C#, Java, Python, GDScript

Software engineer with 6-7 years of professional experience, backed by a long-standing personal passion for coding since 2007. Specializes in user-centered web solutions with focus on maintenable code and effective teamwork.

Work Experience

Full Stack Developer
at Twoday — 2022 - 2025

Contributed to projects of varying scale, from bringing new projects to life to maintaining existing systems. Worked both independently and as a part of cross-functional teams. Handled technical documentation and client communication for selected projects.

React, Azure, Node, Spring Boot, Liferay, Docker, Git, Project management, Client relations, Documentation

Software Developer
at Valo Motion — 2019 - 2021

Designed and developed software and games for Valo Motion's AR platforms from early prototypes to release and beyond, both in teams and independently. Led full technical implementation of game projects, managed small project teams, coordinated design with visual artists and sound designers, and organized tests. Contributed to UX design, data analysis, and technical artist tasks.

Unity, C#, 3D scanning, Git, Project management, Design, UX, Data analysis

Frameworks and engines

React, Angular, jQuery, Node, Express, Vue, Material UI, Tailwind, Bootstrap, Liferay, Spring

Software and tools

Git, Unity, Photoshop, SASS, Azure, Godot, Jest, Vite, Gulp, npm, Mongodb, Excel

Other

REST, Android, VR, AR, GLSL

Theory and concepts

UX design, Usability, Algorithms, Artificial intelligence, Machine learning, Game design, 3D programming

Software developer and designer
at Aalto University — 2018

Worked as a developer and level designer on a 3D physics-based action-puzzle game. Contributed to the technical implementation as well as the design and creation of game environment and overall game structure. Continued development after the end of the contract to prepare the project for public events and showcases in 2018 and 2019.

Unity, C#, HLSL, Git, Project management, Design, Event and conference presentations

Full stack Developer
at Futurice — 2014

Full stack developer at Futurice, communicated directly with clients to design, develop, and maintain web and mobile applications, both in teams and independently.

Javascript, Angular, Drupal, Node, Git, Client relations, Design, UX

Full Stack Developer
at Aalto University — 2012 - 2013

Worked as a web developer at LeGroup, a research unit at Aalto University focused on leveraging emerging technologies to improve teaching and learning. Implemented research-driven projects ranging from prototypes to full-scale web applications.

Javascript, jQuery, Wordpress, PHP, MySQL, Project management, Research, Prototyping

Education

Master's Degree, Information Technology

Aalto University 2017 - 2019

In addition to traditional coursework, the program emphasized hands-on projects, ranging from early concepts to finished products. Areas of study included game and software design and development, programming, 3D animation, usability design, machine learning and artificial intelligence, graphics programming and ray tracing, and project management.

Unity | Machine learning | AI | Graphics programming | Ray tracing | Algorithms | Project work | Team work | Prototyping | Design | Research

Bachelor's Degree, Information Studies and Interactive Media

Tampere University 2013 - 2017

Studies focused on interactive media and game research, including usability and UX design, user and player research, software development, social media research, and information science. Completed minor studies in information technology, programming, software project management, and Japanese language and culture including a year of exchange studies in Tokyo.

C | C++ | Java | PHP | Project management | UX | Research

Vocational Qualification in Business Information Technology

Oulu Vocational College 2009 - 2012

Studies focused on information technology, software and game development, and business management. Coursework included software and game development, 3D modeling, information processing, web development, databases, customer service, business administration, accounting, and project management. Competed twice in the National Skills Competition of Finland (Web design) and placed seventh and second in the finals.

C# | PHP | 3D modeling | SQL | Business management | Customer relations | Accounting
